

Highlights of Periodic Inspection Elevators, Escalators, Travelators & Car-Parking Systems

1. PAPL does a periodic inspection in cycles containing minimum 3 visits in a year covering all units and is not sampling.
2. The inspection identifies, forewarns & recommends replacement of worn out or damaged components that may cause major breakdown. This ensures majority of the shut downs are preplanned, well informed and not sudden or spontaneous. There will be adequate time to order materials.
3. Re-alignment & adjustments will be recommended to enhance user experience, ensure stable operation and improve equipment life.
4. Elevator wise, 100 point performance rating for evaluation of critical parameters.
5. Checking functionality of all emergency and operating features
6. Comparative report of two consecutive inspections to understand the extent of improvement or deterioration of service with adequate photographs. Reports generated through special software to ensure consistency and uniformity.
7. Performance graph upon completion of all inspections of a cycle - unit wise to understand quality of service by elevator service provider.
8. Checklist based independent and impartial inspection in alignment with IS14665 part carried out by professionals with experience in VHT Domain.
9. PAPL is an exclusive VHT specialist service provider and is accredited by NABCB (National Accreditation Board for Certifying Bodies) as an independent inspection body for compliance to ISO/IEC17020:2012
10. PAPL provides certificate of inspection confirming safety and performance on fulfilment of qualifying criteria as well as provide inspection stickers to be placed inside the elevators that will boost the confidence of the users.
